

## PROFESSIONAL SUMMARY

Supply chain and operations professional with experience in fulfilment operations, process design, and systems analysis. SAP S/4HANA EWM certified (SAP, Jun 2026). Built three interactive supply chain projects demonstrating SAP EWM warehouse execution logic slotting, inbound putaway, and KPI analytics hosted at Portfolio. BTech in Information Technology + MS Technology Management (GPA 3.83, UIUC Gies), bridges engineering, analytics, and business stakeholder needs. Lean Six Sigma Yellow Belt.

## WORK EXPERIENCE

### XMReality

**Champaign, USA**

Business Strategy & Operations Program Intern

May 2025 - Aug 2025

- Evaluated 10+ industries to assess U.S. market expansion opportunities, shortlisting **3 priority verticals** based on operational feasibility, customer readiness, scalability constraints, execution risk, and competitive positioning
- Developed and delivered a **3-phase U.S. rollout plan** aligning GTM strategy with operational capacity, **reducing GTM uncertainty** across target markets
- Synthesized insights from **30+ industry sources and 15+ competitive benchmarks**; findings presented by VP of NA Sales to senior leadership for Q4 implementation consideration

### Noshbox

**Champaign, USA**

Operations & Supply Chain Associate

Apr 2025 - Aug 2025

- Owned end-to-end pre-launch supply chain and fulfilment operations for a food-tech startup sequencing launch dependencies across product, supply, and fulfilment functions ahead of go-live
- Engineered **6-8 process maps and SOPs** across 4 fulfilment stages (order intake, vendor coordination, packaging, dispatch) defining step ownership and handoff points; eliminated duplicate tasks, **reducing coordination loops by 20%**
- Identified **3 critical supply and fulfilment bottlenecks** pre-launch via root cause analysis; findings directly informed a revised launch timeline, preventing a false delivery commitment to investors and avoiding a potential breach of stakeholder trust
- Designed and tracked **5+ operational KPIs** covering supply readiness and fulfilment throughput; built Excel dashboards **improving decision turnaround by 25%** across GTM planning cycles

### Saayam For All

**Remote, USA**

Project Manager

Oct 2025 – Present

- Managed sprint planning across **15-20 active tasks per cycle**, improving **on-time delivery by 25%** through structured prioritization and early blocker intervention
- Reduced average milestone cycle time **from 9-10 days to 6-7 days (approx. 30% faster)** by reprioritizing tasks and redistributing workload; designed Kanban dashboards improving WIP visibility across sprints

## PROJECTS

### SAP EWM Supply Chain Portfolio - 3 Interactive Projects

**Jan 2026 - Jun 2026**

- Warehouse Slotting Optimizer**: Scores SKUs by pick velocity, weight, and cold chain requirements; assigns optimal bin zones (A-D + LG05) mirroring SAP EWM storage type search sequence and putaway strategy (SPRO, LG01 - LG05, LS01N)
- GR to Putaway Simulator V4**: 6 inbound scenarios (normal GR, QM hold, short delivery, over-delivery, cold chain, FEFO); batch traceability, dock scheduling, decision tree (/SCWM/TORD, MIGO, QA32, ME22N, /SCWM/TO\_CONF, MB56)
- Pharma Supply Chain KPI Dashboard**: 12-month simulated pharma data; 6 KPIs (OTIF, Fill Rate, MAPE, Days of Supply) benchmarked against Gartner, APICS, HDA, and IBF standards; SAP IBP/MM-IM/SD context

### NVIDIA Supply Chain & Operations Strategy Analysis

**Dec 2024**

- Mapped NVIDIA's fabless supply chain across 10+ independent suppliers (TSMC, Foxconn, Wistron, Fabrinet); applied Porter's Diamond to assess **TSMC single-source concentration risk (43% manufacturing dependency)**
- Produced 3 strategic recommendations - nearshoring to Mexico, supplier diversification into India/Vietnam, and expanding the Global Buy model to reduce geopolitical supply risk

## SKILLS

**SAP & EWM**: ERP (SAP S/4HANA), EWM (Warehouse Task, Putaway Strategy, Storage Type Search, Batch Traceability, FEFO/FIFO, QM Hold, Yard Management), SAP Fiori, MM-IM, SD, IBP concepts, SPRO

**Technical & Data**: SQL, Tableau, Power BI, Excel, Python, PostgreSQL, Google Data Studio, Dashboards, Google Sheets, Github, ProjectLibre, Notion, Sharepoint

**Operations & Supply Chain**: Process mapping, SOP Design, KPI Development (OTIF, Fill Rate, MAPE, DoS), Inventory Management, Lean Six Sigma, S&OP, Agile/Kanban, Performance Tracking, Logistics Coordination

**Strategy & Frameworks**: GTM Strategy, Market Entry, Porter's Diamond, Five Forces, VRIN, Competitive Benchmarking, Root Cause Analysis, Stakeholder Management, Market Expansion, Risk Assessment

## CERTIFICATIONS

Exploring Business Processes for Supply Chain Execution in SAP S/4HANA Cloud Private Edition (SAP, Jun 2026) | **SAP S/4HANA Essential Training** (Linkedin, Jun 2026) | **Lean Six Sigma Yellow Belt** (CSSC, Apr 2023) | **GE Aerospace - Explore Supply Chain** (Forage, 2026) | Google AI Essentials (Coursera, Jan 2025) | McKinsey Forward Program

## EDUCATION

**University of Illinois Urbana-Champaign, Gies College of Business**

**Illinois, USA**

Master of Science, Technology Management (GPA: 3.83) | Gies Graduate Program Scholarship Recipient

**Aug 2025**

**Relevant Coursework**: Global Supply Chain Management, Operations Management, Strategic Management, Project Management, Analytics for Decision Making, Data Storytelling

**Manipal University Jaipur, B.Tech, Information Technology**

**India, Aug 2022**
